Electronic Ignition System Options: WiFi or Bluetooth Remote Control • Commercial Timer/Shutoff • Emergency Shutoff Switch • Utility Post

WEATHER BEATER ELECTRONIC CONTROL SYSTEM

The ultimate control for outdoor fire features, the Weather Beater is powered by a state of the art microprocessor and provides safe and sure control of ignition and operation. Built to withstand harsh outdoor conditions, the Weather Beater constantly monitors your fire and will even relight it in the case unusually high winds or rain temporarily extinguishes it. This system uses commercial-grade components to ensure years of trouble free operation and includes on-board diagnostics to report on the unit's performance. Available for use with LP or Natural gas.

Standard Capacity up to 350K BTUs • High Capacity up to 490K BTUs

ALL WEATHER ELECTRONIC IGNITION SYSTEM (AWEIS)

The AWEIS (All Weather Electronic Ignition System) is the industry's leading fire feature ignition solution. Built for commercial-grade performance, this fully automated ignition system delivers unmatched reliability and safety in any climate. Whether you're designing a simple backyard bowl or a large-scale architectural fire installation, the AWEIS provides consistent ignition, wind resistance, and intelligent flame monitoring in a compact and easy-to-install unit. Compatible with Natural Gas or Liquid Propane.

Standard Capacity up to 290K BTUs • High Capacity up to 510K BTUs

UTILITY POST • TIMER SWITCH • EMERGENCY SHUTOFF SWITCH

• This Utility Post enhances safety and convenience for managing commercial fire features in outdoor spaces. Made from heavy gauge Steel and Powder Coated, this durable Utility Post can handle the elements and high traffic areas.

• This Timer Switch will provide ease of use with the ability to set operation times up to 60 minutes and housed in a weatherproof enclosure.

• This Emergency Shutoff Switch is built for outdoor fire features and gives you the ability to instantly cut off the gas supply in the event of an emergency. Housed in a weatherproof enclosure for dependable operation.

BATTERY POWERED ELECTRONIC IGNITION SYSTEM

The Battery Powered Electronic Ignition System was developed for use in portable Fire Pits and Fire Tables. With this system and a portable LP gas tank, you no longer need to invest in expensive gas lines and electrical wiring. After installed, a simple flip of a switch and your fire feature will ignite itself, monitor the flame and relight itself if ever the flame goes out.

SUBMERSIBLE ELECTRONIC IGNITION SYSTEM

The SUBEIS (Submersible Electronic Ignition System) is designed specifically for creating real fire directly on water. The SUBEIS pairs with a submersible manifold to deliver a visually stunning flame rising through water, completely hiding the mechanical components. Ideal for water-based fire features, this commercial-grade system offers reliability and safety for full-time underwater operation.
